

Secure & Govern Every Identity with

# Identity360 Connect

AN AI ENABLED PLATFORM

Modern organizations operate across hybrid infrastructures — cloud, legacy, and on-prem systems. However, managing employee identities and access across these environments has become a growing nightmare and a costly one:

## Manual provisioning

Slow onboarding and risky offboarding.

## Disparate systems

Inconsistent user data and compliance gaps.

## Stretched IT teams

Wasted time and exposure to “zombie accounts.”

Access management & periodic review audit reports are often hard to create and become a sore point during audit. **Identity360 Connect** helps you create and support Audit findings, by providing automated access review with **agentic AI**.

Over **90%\*** of organizations faced an identity-related incident in the past year. Over **50%\*** of breaches start with compromised credentials.

## It's time to rethink identity management.

## Introducing Identity360 Connect

Your Self-Service SCIM Gateway for Unified and Secure Identity Control enabled with AI.

Manual provisioning slows teams down, exposes security gaps, and drives up compliance risk. Identity360 Connect eliminates identity chaos with a plug and play, self-service SCIM (System for Cross-domain Identity) gateway that automates access across all your tools — cloud, on-prem, or hybrid — without custom scripts or consulting dependencies. The solution seamlessly integrates with Modern Identity Governance platforms like Microsoft Entra IGA and provides the full identity life cycle automation.

## What Makes Identity360 Connect Different?

**Fully Automated Provisioning**  
Instantly onboard, update, or offboard users across systems based on roles or rules.

**Broad Compatibility**  
Works with any major IdP, HRIS, and modern or legacy apps via REST, SOAP, PowerShell, and more.

**No-Code Self-Service Setup**  
Configure and deploy without external help — your IT team stays in control.

**Built for Any Environment**  
Cloud, hybrid, or on-prem — Identity360 Connect™ scales to your architecture.

**Compliance-Ready by Default**  
Comprehensive logs and policy alignment with ISO, HIPAA, GDPR, and NIST.

**AI Enabled Roles Discovery & Access Review**  
Agentic AI will auto-discover roles and suggest periodic reviews.

## Identity Control That Works for Everyone

Role	Key Outcomes with Identity360 Connect:
 CIOs/CISOs	Stronger security, zero zombie accounts
 IT admins	Less manual work, more control
 Compliance teams	Audit-ready logs, consistent access enforcement & automated periodic review
 HR and Operations	Smooth onboarding/offboarding without IT delays

## Identity360 Connect Delivers

- Faster onboarding/offboarding
- Stronger security posture
- Centralized identity orchestration
- Compliance made effortless with power of AI
- Lower IT burden
