

AutoIQ Incident Report Agent

Turn Microsoft Sentinel data into executive-ready intelligence, instantly.

AutoIQ Incident Report Agent for Microsoft Security Copilot automates everything your analysts dread – reports, dashboards, and data storytelling – in just a few clicks.

No KQL. No formatting. No waiting.

Redefining
Security
Operations
Reporting

Why Leading SOC's Choose AutoIQ

From hours to seconds

Slash reporting time from 6–11 hours to 2 minutes flat.

Always polished, never manual

Standardized, error-free reports in consistent executive formats.

Compliance without the chaos

Instantly produce regulator-ready documentation on demand.

Built for clarity at the top

Executive summaries and deep dives that make security data decision-ready.

Visual by design

Fully interactive BI dashboards packed with trends, KPIs, MITRE ATT&CK mapping, and risk visuals.

Smarter Reporting, Delivered

Automated reporting

Generate executive and technical reports using plain language commands.

Integrated Power BI dashboards

Drill down through live Sentinel data with professional-grade visuals.

Monthly auto-reports

Set once, and let AutoIQ deliver visual summaries every month.

Accelerate Your RoI With AutoIQ

Challenge	Traditional Approach	AutoIQ Impact
Manual report creation	4–8 hrs/month	1-2 mins
Dashboard building	2-3 hrs/month	Auto-generated
Analyst burnout	High	Reduced
Inconsistent formats	Common	Full Standardized
Audit preparation	Weeks	Hours

72–132 hours saved per year | \$3,900+ saved on analysts annually | Immediate payback

Engineered for the Modern SOC

Native to **Microsoft Security Copilot**

Direct **Sentinel integration**

Secure, scalable, Direct and enterprise-ready

Natural-language automation zero learning curve

Powering Every Stage of the Security Operations Cycle

Executive briefings

Board-ready in minutes

Audit & compliance

Always inspection-ready

Critical incidents

15-minute impact summaries

Risk & trend analysis

Clear, visual threat insights
